

What's New at K2?

A message from Executive Vice President, Jack Philpotts

"It's an honour to step into the Executive Vice President role here at K2, especially at such an exciting time for the business. Throughout my 10 years at K2 I have been privileged to work with so many fantastic people and I look forward to guiding them into what I am certain will be a truly successful future.

I am committed to providing greater clarity for our customers, empowering the team to achieve their goals and ultimately supporting maternity professionals in improving standards of care for women and babies throughout their maternity journey."

*NEW Athena v6.1 Release 2 *

We are delighted to share that Release 2 (R2) of Athena v6.1 has been completed

With Release 1 (R1) being launched earlier this year, we have been working hard to adhere to mutually agreed timelines and provide the necessary support to ensure a smooth and positive transition.

This new release provides users with increased functionality and updated benefits over our already successful V5 solution.

The entire K2 team have been involved in ensuring the effective execution of R2 and we are extremely pleased with the excellent feedback we have received so far, and the longstanding partnerships we enjoy with our customers have never been stronger.

Our commitment to 6.1 will see yet more sites receive this new release in the coming months and we continue to work hard on Release 3 (R3) which will take into account all user feedback and ensure the system provides the most efficient and user-friendly solution in the market.

For more information on Athena v6.1 or to book a discovery call, please visit our website.
